

HiVis Embroidered Emblems

HiVis embroidered emblems for high visibility wearer safety!

HiVis Embroidered Emblems are a perfect complimentary solution for the embellishment of high visibility garments. They can also be used as the “hi-vis” component on garments that do not already have high visibility properties. Whether they are used to match the garment or to stand out on their own, HiVis Embroidered Emblems add an extra measure of visibility and safety to the garment, and to the wearer, in day-light and low-light conditions.

HiVis Embroidered Emblems are manufactured with 100% polyester HiVis twill fabrics, the same types of materials used for standard custom embroidered emblems. 100% polyester embroidery threads are used to create designs with up to 15 colours. These emblems are usually finished with Merrowed borders, but they can also be produced with stitched borders to create a LowProfile® style emblem. To complete the “hi-vis” look, special thread colours have been chosen to match the HiVis fabric colours available.

The emblems can be finished with high-melt glue, low-melt glue, pressure sensitive, Velcro® or non-woven backings, and can be heat sealed or sewn onto the front chest, shoulder or back of garments, to highlight the full image of the uniform. Name crests are also available, to further personalize the garment to the wearer. The emblems are industrial and commercial launderable, relative to backing type and application method.

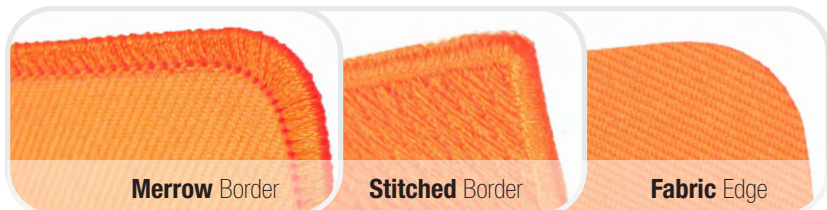

HEAT SEAL APPLICATION

Hi-melt glue
385°F to 405° (196°C to 207°C).

Low-melt glue
365°F to 385°F (185°C to 196°C).
