

Avery Dennison®
9855™
Thermal Printer

The Avery Dennison® 9855™ is a tabletop or bench mount thermal label printer suitable for large volume printing of garment identification and barcode labels. The printer is capable of handling labels up to 102mm wide and is configured with a 300dpi print head. The 9855™ can process labels at speeds of between four and six inches per second, making it possible to print at least 200 continuous garment identification labels per minute, relative to data flow, print resolution, label format and size. The printer comes with standard USB, parallel and serial interfaces.

For accurate label to label alignment, the 9855™ is equipped with sensors to detect perforated label notches or the gaps between pressure sensitive labels that are supplied on a silicone label carrier in continuous form. The printer is also able to detect registration marks that may be printed on the reverse side of some label tapes. The 9855™ can accommodate large spool thermal ink ribbons up to 600 meters in length, and the printer can be interfaced with an optional rewinder.

FEATURES

- ☑ High volume printer.
- ☑ Label widths up to 102mm.
- ☑ 300dpi print head.
- ☑ 200 labels per minute. (*variable)
- ☑ USB; parallel; serial interfaces.
- ☑ Optional rewinder.
