

EMBROIDERED emblems

Custom

SimBroidery®

LowProfile®

GloDark

Embroidered Emblems are manufactured with 100% polyester twill fabrics and 100% polyester embroidery threads, with up to 15 colours per design. They can be formatted into many different shapes and sizes, and can be finished with or without a Merrow border.

Appliqué

EMBROIDERED emblems for Safety Wear

Reflective

HiVis

Flame Resistant

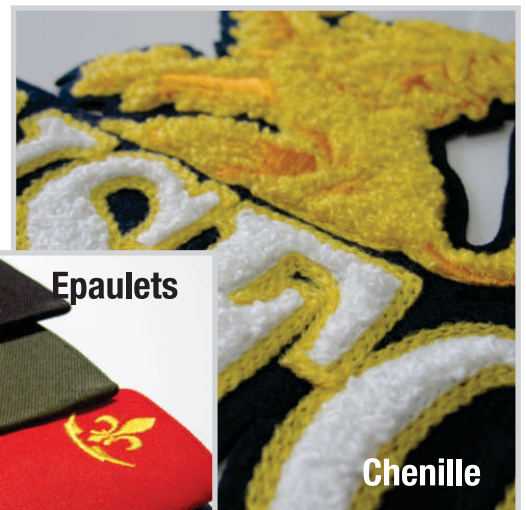

Embroidered Emblems can be used to embellish garments and safety wear, which are worn in low-light or dark conditions, and on uniforms that require elevated safety and flame resistant standards. Using various types of reflective fabrics, high visibility twills and top-level flame resistant materials, these emblems add an extra level of wearer safety.

They are also used in all walks of life, to embellish a wide range of industrial garments, military and service uniforms, career-wear, sportswear, recreational clothing and other textile products. They are used to project a corporate image; to promote a brand; to identify group membership and rank; and to signify team spirit.

Felt

Chenille

Epaulets

A banner image showing the landing gear of an aircraft. The text "Embroidered TAGS" is overlaid in a green box in the center. In the background, a person in a high-visibility vest is visible, and another person in a blue uniform is walking. The aircraft's landing gear and tires are in the foreground.

Embroidered Emblems can easily be used as key-tags, pull-tags or luggage-tags when equipped with various accessory options such as grommets and split-rings, chains, half-moon clips or plastic straps. They can be used to hold a set of keys; to be clipped to back-packs; to identify luggage; to code laundry bags; to mark key components on aircraft; to flag equipment lock-status; or as a small promotional item.

Softshell

Wearable

Perfect for **athletic clothing** and **swimwear**.

Non-solvent, eco-friendly.
Chlorine tested.

40% to 70%

UltraTranz™ transfers are produced with water-based, eco-friendly inks and adhesives, and are an ideal solution for embellishing garments manufactured with cotton, poly-cotton, and stretchy fabrics, such as t-shirts, sweatshirts, hoodies, activewear, sportswear, and uniforms. They can also be applied to non-sublimated polyester fabrics, and textiles without patterns. These transfers are flexible, can be stretched, and will not crack or peel."

UltraTranz™ transfer types:

Wearable, Dye Blocker, Softshell Blocker, Headwear, Promo, Low Melt, Reflective and Metallic.

HiTranz® Poly

HiTranz® Poly transfers are manufactured with specially formulated technical inks, coatings and adhesives, which are fully industrial launderable to wash temperatures of **200°F (95°C)**. These transfers are primarily used to embellish uniforms, work-wear, clean-room gear, high visibility garments and flame resistant clothing. **HiTranz® Poly** transfers can also be manufactured with anti-static (**PolyAS**) or flame resistant (**PolyFR**) ink and adhesive compositions, best suited for these types of specialized garments.

Reflective Transfers and Emblems

Reflective Transfers are produced with retroreflective transfer films. The transfers are cut and formatted to be heat seal applied directly to garments and textiles. As an alternative, Reflective Transfer Emblems are manufactured with 100% polyester twill or flame resistant fabrics, which can be sewn onto uniforms and safety wear. The emblems can also be removed as required.

HiTranz[®] Reflective

HiTranz[®] Reflective Transfers are printed with specially formulated inks that contain reflective additives. These transfers can be heat seal applied directly to garments and textiles, and designs can be formatted with a range of features and intricate details.
